

VICUNA FACTSHEET

<https://vicuna.network>

- 1 VICUNA:** Vicuna (*Vicugna vicugna*) are the smallest member of the camel family, and are the wild ancestor of the alpaca, Our Metaverse name is VICUNA with unique solution to provides unique ecommerce experience on Metaverse
- 2 VINA:** Name of the token used in VICUNA Platform.
- 3 VICUNA VISUAL COMMERCE:** buy and sell on E-Store using the state of the art technology in Virtual Reality, Augmented Reality with Vicuna AI. It leverages the user experience to buy more and better user experience totally on Metaverse.
- 4 4D Experience:** user can touch, sense, and even smell the goods and products, 3D view and auto-fit option are also available on it.
- 5 Blockchain Net Prefer:** If Users order something on the e-commerce network, any trusted nodes on VICUNA Chain and miners can offer better prices and providers. Nodes earn by finding the best fee for products, clients buy products at lower price.
- 6 Democratized Ads:** traditional concepts for ad publishing like google can not detect real buyers. Nodes can select to advertise or sell for providers in a distributed manner with e-commerce verified id, even though people can get a loan and extend their business easily on VICUNA Blockchain.
- 7 Price watch & Waive:** It uses VICUNA AI Engine to find the best possible price using search method over ecommerce stores. It also apply best possible offers and discounts available, also client pay less because of lowest transaction fees.
- 8 Blockchain Refer:** Any node can be final buyer or referrer to the network of customers, as recursive algorithm. Block-Net algorithm force user to make chain small as possible(as network profits distribute in reversal form and leaf nodes get more and top node earn less) to create more effective referral networks.
- 9 META ID:** E-Commerce Special identity on Metaverse, it preserves real identity but provides commerce needed identity information. Its specially designed to support e-commerce needs, and protect user identity. Distributed data store and unique features based on VICUNA Metaverse
- 10 VICUNA Meta-Credit:** VICUNA allows its users to experience a new type of banking and financial setup in its Metaverse. VICUNA has introduced Meta Credit for its users. Meta-Credit aims to provide functionality to convert your real credit to Meta-Credit.
- 11 VICUNA FitNet:** Fit-Net provides an opportunity for buyers to “try” things before making a purchase. It have unique distributed social media as secure way to communicate on VICUNA Metaverse. People can earn money by rank/rate and or any activities on VICUNA E-Commerce Metaverse.
